

Genesee Avenue Construction Activities

Construction activities continue along Genesee Avenue to facilitate construction of the Mid-Coast Trolley extension.

Preliminary work activities to widen Genesee Avenue, from Regents Road to La Jolla Village Drive, are ongoing. This work includes utility relocation, barrier installation, road re-striping, median and sidewalk demolition, and preparation to construct the viaduct — a bridge structure that will carry the trolley down the middle of Genesee Avenue.

Several different traffic control phases involving long-term lane closures and shifts will be ongoing as this work progresses on both northbound and southbound Genesee Avenue. Traffic control phasing and lane configuration may vary between day and night work hours. Traffic control signs, including necessary detours for motorists, pedestrians and bicyclists, will be posted. These types of traffic controls will be deployed at various times through early 2018. Please use alternate routes.

Day work hours are Monday through Thursday, from 7 a.m. to 5 p.m. Night work hours are Monday through Thursday, from 8 p.m. to 5:30 a.m. Work shifts will alternate between day hours and night hours as needed. Traffic controls will remain in place 24 hours a day.

Please heed all traffic signs and traffic flagger direction, and use caution when traveling near the work area.

Crews will minimize impacts to neighboring residents and businesses as much as possible. Check for any changes in bus routes and stops at www.sdmts.com.

Construction schedules are subject to change.

About the Project

The Mid-Coast Trolley project will extend Trolley service from Old Town Transit Center to the University City community, serving major activity centers such as Mission Beach, the VA Medical Center, UC San Diego, and Westfield UTC. Nine new stations will be constructed. Major construction work began in 2016, with service anticipated to begin in 2021.
