APPENDIX

B EXISTING LEVEL OF TRAFFIC STRESS

QUALITY/CALIDAD

Level of Traffic Stress is a widely accepted measure of the quality of bike facilities. It evaluates several criteria to determine the overall comfort of a bike facility to different users. The map at right depicts three levels of quality or comfort: El Nivel de tráfico es una medida ampliamente aceptada para medirla calidad de las instalaciones para el uso de la bicicleta. Se evalúan varios criterios para determinar la comodidad general de una instalación de bicicletas para diferentes usuarios. El mapa de la derecha muestra tres niveles de calidad o comodidad:

- **Best: Comfortable for all riders**
  Optima: Apto para todos los ciclistas
- **Moderate: For more experienced riders**
  Moderar: Para ciclistas con más experiencia
- **Worst: Only for highly confident riders**
  Peor: Solo para ciclistas altamente confiados

Study Area/ Área de estudio

The study area is characterized by a wide range of facilities. In general: El área de estudio se caracteriza por una amplia gama de instalaciones. En general:

- **The most comfortable bike routes are separated trails and smaller roadways in residential areas.** Las rutas más cómodas para los ciclistas , so los la separados y caminos más pequeños en áreas residenciales.
- **The least comfortable bike routes are along major roadways such as Palm Avenue, Imperial Beach Boulevard, and Beyer Boulevard. They act as barriers to connectivity within the study area.** Las rutas menos cómodas para los ciclistas son a lo largo de las carreteras principales tales como avenida de la palma, bulevar imperial de la playa, y bulevar *de Beyer.* Actúan como barreras a la conectividad dentro del área de estudio.

Evaluation Criteria/ Criterios de evaluación

The evaluation criteria vary by facility type: Los criterios de evaluación varían según el tipo de establecimiento:

- **Multi-use paths and other separated facilities are automatically given the best rating, as they are physically separated from vehicular traffic and therefore unaffected by the auto-centric criteria in the table.** Las vías de acceso múltiple y otras instalaciones separadas del trafico vehicular reciben automáticamente la mejor calificación, ya que están físicamente separadas del tráfico y, por lo tanto, no se ven afectadas por los criterios autocéntricos de la tabla.
- **Bike lanes are rated based on the roadway speed, number of auto lanes, width of the bike lanes, and the frequency of blockages.** Los carriles de bicicletas se clasifican según la velocidad de la carretera, el número de carriles automáticos, el ancho de los carriles de carros y la frecuencia de bloqueos.
- **Shared bike routes are rated based on the roadway speed, number of auto lanes, and the presence of residential land uses surrounding the facility.** Las rutas de bicicletas compartidas se clasifican en función de la velocidad de la carretera, el número de carriles de carros y la presencia de areas residenciales que rodean la instalación.

This is a split phase operation with ϕ2+5 and ϕ1+6 operating together, accomplished by strapping together detectors for ϕ2+5 and ϕ1+6. During EV and trolley preemption ϕ2+6 operate together.

LOCATION: San Ysidro Boulevard & Jack in the Box Dwy/ I-5
