

Appendix G

MITIGATION MONITORING AND
REPORTING PROGRAM

Mitigation Monitoring and Reporting Program

The California Environmental Quality Act (CEQA; California Public Resources Code §21081.6) requires public agencies to adopt a monitoring and reporting program for the revisions which it has required in the project and the measures it has imposed to mitigate or avoid significant environmental effects. In order to ensure implementation of the mitigation measures and design features identified in the Mitigated Negative Declaration (MND), SANDAG shall adopt a Mitigation Monitoring and Reporting Program (MMRP). This MMRP has been prepared in accordance with the proposed Bayshore Bikeway – Segment 8B Project, the environmental effects of which have been evaluated in an MND prepared in compliance with CEQA and the CEQA Guidelines.

This MMRP identifies the mitigation measures and design features that shall be implemented by SANDAG as the responsible party and the timing of implementation. SANDAG may delegate the reporting or monitoring responsibilities identified below to another entity that accepts the delegation (such as a construction contractor). However, until the mitigation measures and design features included in the MMRP have been completed, SANDAG remains responsible for ensuring that implementation occurs in accordance with the adopted program (CEQA Guidelines §15097[a]).

Design Feature or Mitigation Measure	Timing	Responsible Party	Completed	Initials	Notes (Optional)
Biological Resources					
BIO-1 Temporary impacts to 0.22 acre of coastal brackish marsh shall be mitigated at a 1:1 ratio. Mitigation for temporary impact areas would occur either through restoration of impacted areas to their pre-impact contours and conditions, through habitat mitigation, or as determined through consultation with the resource agencies.*	Prior to construction	SANDAG	<input type="checkbox"/>	---	
BIO-2 Permanent impacts to 0.07 acre of coastal brackish marsh shall be mitigated at a 2:1 ratio. Mitigation for permanent impacts would occur through on- and/or off-site restoration, enhancement, and/or establishment/re-establishment with an establishment/ re-establishment ratio of 1:1, or purchase of credits at an approved mitigation bank. Final mitigation requirements for impacts to coastal brackish marsh would be determined in consultation with the resource agencies.*	Prior to construction	SANDAG	<input type="checkbox"/>	---	
BIO-3 Temporary impacts to 0.003 acre of open water shall be mitigated at a 1:1 ratio. Mitigation for temporary impact areas would occur either through restoration of impacted areas to their pre-impact contours and conditions, through habitat mitigation, or as determined through consultation with the resource agencies.	Prior to construction	SANDAG	<input type="checkbox"/>	---	
BIO-4 Permanent impacts to 0.002 acre of open water shall be mitigated at a 2:1 ratio. Mitigation for permanent impacts would occur through on- and/or off-site restoration, enhancement, and/or establishment/re-establishment with an establishment/ re-establishment ratio of 1:1, or purchase of credits at an approved mitigation bank. Final mitigation requirements for impacts to open water would be determined in consultation with the resource agencies.	Prior to construction	SANDAG	<input type="checkbox"/>	---	
BIO-5 Permanent impacts to 0.03 acre of streambed shall be mitigated at a 1:1 ratio. Mitigation for permanent impacts would occur through on- and/or off-site restoration, enhancement, and/or establishment/re-establishment with an establishment/ re-establishment ratio of 1:1, or purchase of credits at an approved mitigation bank. Final mitigation requirements for impacts to open water would be determined in consultation with the resource agencies.	Prior to construction	SANDAG	<input type="checkbox"/>	---	

*BIO-1 and BIO-2 would also mitigate impacts resulting from storm drain facilities to be implemented as part of the project as identified in Section 7.17, Utilities and Service Systems, of the IS/MND.

Design Feature or Mitigation Measure	Timing	Responsible Party	Completed	Initials	Notes (Optional)
Biological Resources (cont.)					
<p>BIO-6 If construction occurs between February 15 and September 15, a qualified biologist shall conduct a pre-construction survey to determine the presence or absence of nesting birds within the project site or adjacent habitat. The pre-construction survey must be conducted within 10 calendar days prior to the start of construction, and the results must be submitted to SANDAG for review and approval prior to initiating any construction activities. If any active nests are detected, the area will be flagged and mapped on construction plans along with a 300-foot buffer, or as recommended by the qualified biologist. The buffer area(s) established by the qualified biologist shall be avoided until the nesting cycle is complete or it is determined that the nest has failed.</p>	<p>Prior to construction/ During construction</p>	<p>SANDAG</p>	<p style="text-align: center;"><input type="checkbox"/></p>	<p style="text-align: center;">—</p>	
Cultural Resources					
<p>CUL-1 Prior to construction, temporary construction fencing shall be installed along the western edge of the APE, which is identified as six feet west of the eastern ROW line of APN 621-010-02. Fencing shall remain in place during all construction activities for the duration of the project construction period.</p>	<p>Prior to construction/ During construction</p>	<p>SANDAG</p>	<p style="text-align: center;"><input type="checkbox"/></p>	<p style="text-align: center;">—</p>
