ABOUT THE PROJECT

The 2.6-mile Pershing Bikeway will improve connections through Balboa Park and between North Park and Downtown San Diego and enhance access to the larger bikeway network being built throughout the region. Proposed project features include buffered bike lanes and a separated bikeway to make biking and walking a safer, more convenient travel choice.

The project team considered the needs of all roadway users throughout the planning process, including people who bike, walk, and drive in the area. The Pershing Bikeway will provide biking and walking enhancements and encourage lower roadway speeds, which improves safety for everyone, including people driving. The enhancements proposed by the project will not cause traffic impacts, as defined by the City of San Diego Significance Thresholds for Traffic Impacts.

PROJECT TIMELINE

ABOUT TONIGHT'S OPEN HOUSE AND PUBLIC HEARING

The open house and public hearing marks an important step for the Pershing Bikeway project, following one year of community engagement and project refinement. Attendees are encouraged to learn about the project and speak with project team members. The written and spoken comments collected at tonight's open house and public hearing, as well as written responses to those comments, will be provided to the SANDAG Transportation Committee for its consideration before any action is taken related to the project's California Environmental Quality Act (CEQA) compliance. The SANDAG Transportation Committee is anticipated to consider whether the project is exempt from CEQA at its January 20, 2017 meeting.
