# ELEVATE YOUR TRANSIT

### Rapid Stations Update

Crews work to form and pave the elevator building north of University Ave.

Construction crews are performing storm drain work along the west shoulder of southbound State Route 15 (SR 15) north of Adams Avenue. Work will occur Sunday through Thursday from 7 p.m. to 5 a.m. through the summer. Additionally, crews have continued paving work on the elevator buildings north and south of University Avenue, and have made progress forming the elevator building north of El Cajon Boulevard.

As the safety of motorists and workers is the highest priority, the majority of construction work takes place at night to minimize traffic impacts. Night work also allows construction vehicles to move safely in and out of construction zones. Crews will work to minimize noise and light impacts to the surrounding neighborhoods. Thank you for your patience during construction.

### Project Summary

The \$65 million project will build San Diego's first freeway-level transit stations along SR 15 at El Cajon Boulevard and University Avenue. New 2.5-mile transit-only lanes also will be constructed within the existing SR 15 median from just north of Interstate 805 to just south of Interstate 8. The SR 15 Mid-City Centerline Rapid Transit Stations Project is expected to be completed in 2017.

### SR 15 Commuter Bikeway Update

Construction crews have been performing retaining wall excavation and demolition along the east shoulder of northbound SR 15 at the Adams Avenue on-ramp. Work will occur Sunday through Thursday from 7 p.m. to 5 a.m. through mid-May. During this time, the northbound on-ramp at Adams Avenue and the northbound off-ramp at Camino Del Rio South will be closed intermittently.
