

## Concrete Crushing Operations to Begin

Over the next three weeks, construction crews will be crushing concrete from the demolished East Palomar Street Bridge. The work will take place weekdays between the hours of 7 a.m. and 4:30 p.m. Residents can expect daytime noise from concrete crushing operations. Crews will take all reasonable steps to minimize impacts to nearby residents, including spraying down materials with water to minimize dust. We appreciate your patience during construction.

Materials will be crushed and recycled and used in the building of the new East Palomar Street Direct Access Ramp (DAR). Recycling the material will save approximately 2,240 truck trips to/from the site.

### About the Project

The work is part of the I-805 South Express Lanes Project, a \$1.4 billion effort to create a modern new transportation backbone for South County. The first phase of the project includes construction of 10 sound walls and one carpool lane in each direction along an eight-mile segment stretching from East Palomar Street in Chula Vista to State Route 94 in San Diego. Phase 1 also includes the construction of a Direct Access Ramp (DAR), Transit Station, and Park & Ride at East Palomar Street in Chula Vista. Phase 1 is expected to be completed in late 2014.
