

Concept 1: North-South Trail

This 0.8-mile trail along the east side of the railroad provides an accessible route from Seagrove Park to 4th Street.

8th Street Drainage Culvert with Fill

Notable concept features include:

- **Accessible Paths:** All paths are designed to be six feet wide, feature ADA-compliant grades, and can utilize a special form of stabilized decomposed granite for an accessible surface. Some areas, especially north 8th Street, may require retaining walls, some of which may be below grade and/or covered with fill and landscaping to reduce visual impacts.
- **Accessible Connections to All Street Ends:** accessible connections to Seagrove Park and all numbered streets from 13th Street to 4th Street. These also may include optional connections to the railroad crossings proposed in Concepts 2-7, if implemented together.
- **8th Street Drainage Culvert with Fill:** A relatively low-impact way to traverse the drainage infrastructure just north of 8th Street is to place the trail atop parts of the drainage culvert, supported by a wall that is partially covered by fill and landscaping.
- **9th Street Plaza:** This optional feature could be added to street ends such as 9th Street to provide an additional amenity for public views.

9th Street View Plaza
