

## DEL MAR BLUFFS STABILIZATION PROJECT UPDATE

OCTOBER 2020

### Upcoming Weekend and Nighttime Bluff Stabilization Activities

Beginning October 3, SANDAG crews will be working on the Del Mar Bluffs Stabilization project as rail service is suspended in San Diego starting Saturday, October 3 at midnight through Monday, October 5 at 5 a.m.

This weekend, crews will install tieback anchors along previously placed support columns to help reinforce the bluffs, near Sea Orbit Lane.

#### What You Can Expect:

- Construction will begin at midnight on Saturday morning, October 3 and continue through Sunday evening, October 4
- **Crews will begin prepping the work site near Sea Orbit Lane starting at approximately 1 a.m. on Saturday, October 3. The work includes clearing debris in preparation for tieback anchor installation**
- Tieback anchors will be installed along previously placed support columns near Sea Orbit Lane. The work includes drilling holes into the bluffs, placing anchors, and filling them with concrete
- Residents may notice the presence of work crews, heavy construction equipment, noise, dust, and Occupational Safety and Health Administration (OSHA) required vehicle back-up alarms

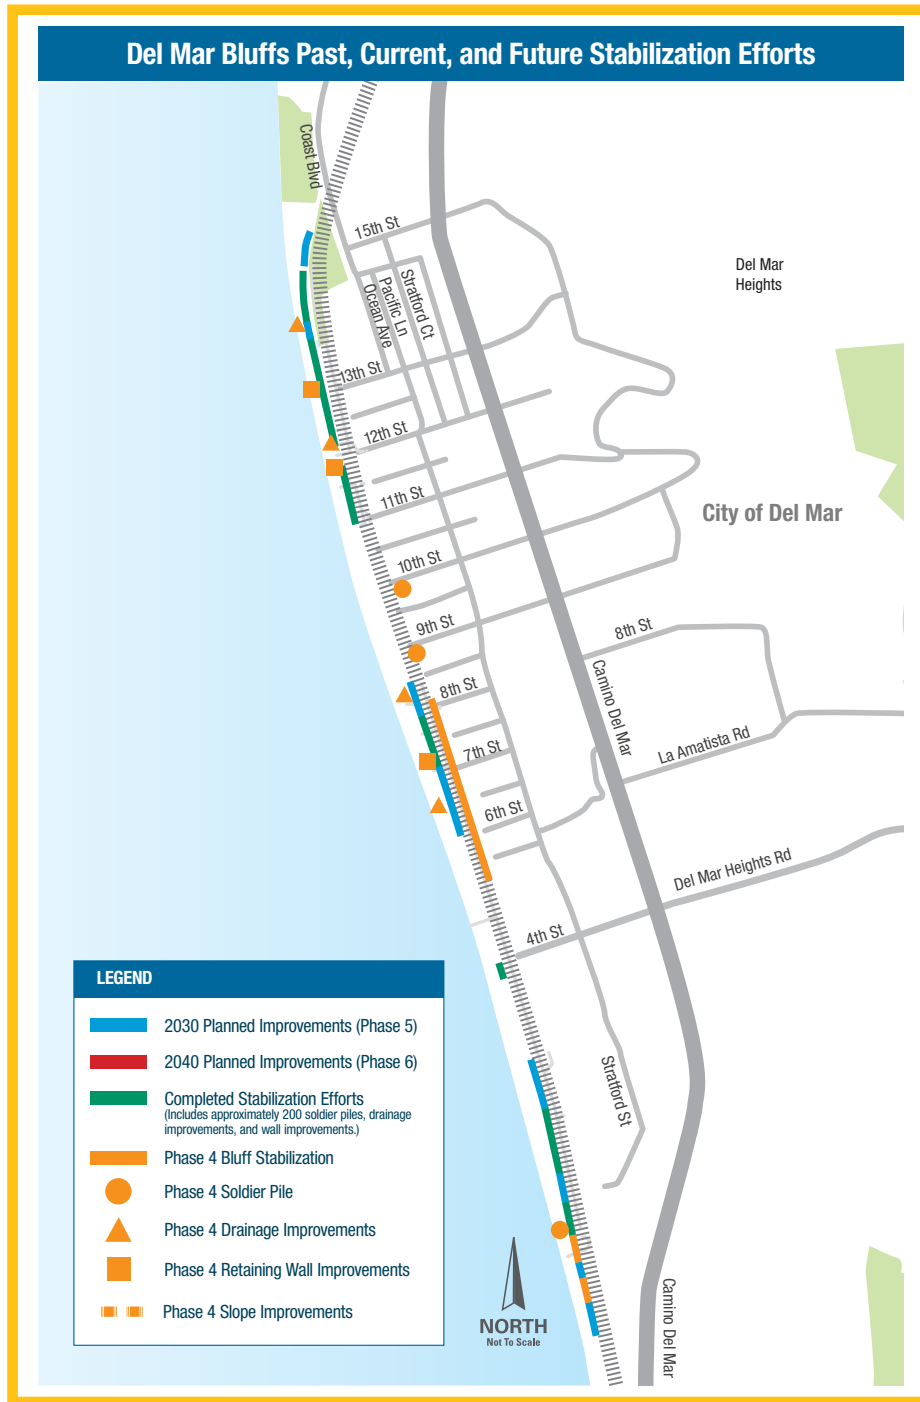

This work is expected to create noise, however, crews are aware of residents in the area and will minimize impacts to the maximum extent possible. Please note, construction schedules are subject to change.

#### TRAIN HORN RULES

Federal regulations require the train engineer to sound the horn when approaching an active construction site, even in a quiet zone. Train horns serve as a warning system to ensure the safety of railroad workers. More information and rules governing the use of train horns can be found on the Federal Railroad Administration's website at [www.fra.dot.gov](http://www.fra.dot.gov).
