## Project Map

## About the Project and Preliminary Construction Activity

Construction will begin in mid-March for the Poinsettia Station Improvements project. Preliminary construction activities will include clearing of vegetation, installation of construction fencing, staging of materials and equipment, and drilling to relocate underground utilities. The project will enhance pedestrian safety, provide protected access, reduce train delays, and upgrade station amenities.

Improvements will include lengthening and elevating passenger platforms, installing a fence between the tracks within the station, relocating a section of the existing tracks, and replacing the existing at-grade rail crossings with an undercrossing featuring stairways and ramps on both sides of the tracks. Station enhancements will include new shelters, signage, and updated lighting.

**Construction is anticipated to be complete in 2020.**
