

Poinsettia Station Improvements Project

Construction to Begin March 2018

LOSSAN Los Angeles
San Diego
San Luis Obispo
Coastal Rail Corridor
San Diego Segment

Preliminary construction activities will include clearing of vegetation, installation of construction fencing, staging of materials and equipment, and drilling to relocate underground utilities. The project will enhance pedestrian safety, provide protected access, reduce train delays, and upgrade station amenities.

PLANNED IMPROVEMENTS

- Lengthened 1,000-foot boarding platform
- Elevated platform for level boarding for Amtrak passengers
- New passenger undercrossing with stairs and ramps on both sides of the tracks
- Fencing between tracks within the station
- Relocation of existing rail tracks
- Enhanced customer amenities that will include new canopies, signage, and updated lighting
