Construction to Begin This Month on Sorrento Valley Double Track Project

PROJECT OVERVIEW:

The Sorrento Valley Double Track project will help to improve the reliability and on-time performance of COASTER, Amtrak, and BNSF Railway services by removing a bottleneck along San Diego's coastal rail line and allowing passenger and freight trains to pass each other as they enter and leave the Sorrento Valley transit station. Project features include:

- Adding 1.1 miles of second track north of the transit station.
- Adding a new 81-space surface parking lot south of the transit station.
- Raising the railroad tracks above the flooding level of 50-year storm events.
- Replacing two aging wooden trestle bridges with new concrete structures.
- Installing drainage and embankment improvements.

ABOUT THE LOSSAN RAIL CORRIDOR IMPROVEMENTS PROJECT:

The San Diego Association of Governments (SANDAG) is working in collaboration with the North County Transit District (NCTD) to plan, design, and construct approximately \$1 billion in improvements along the San Diego County section of the LOSSAN (Los Angeles-San Diego-San Luis Obispo) coastal rail corridor, with the primary goal of double tracking the entire corridor from Orange County to Downtown San Diego. Additional improvements include bridge and track replacements, new platforms, pedestrian undercrossings, and other safety and operational enhancements. The rail improvements are part of an effort to improve all modes of transportation within the congested Interstate 5 North Coast Corridor.

Project Construction Schedule:

February 2014 through late 2015
Monday through Friday
7 a.m. to 3:30 p.m.

Because this is an active rail line with more than 50 trains per day, some of the construction must be conducted during off-peak hours on weekends and evenings. Construction crews will work to minimize noise and traffic impacts to nearby businesses. Please use extra caution when construction crews or vehicles are present.

We appreciate your patience during construction.
