

# Rail Construction Courtesy Notice

## Sorrento Valley Double Track Project *Upcoming Noise Impacts*

Construction crews will begin work in April to replace a rail bridge, located just north of the Sorrento Valley COASTER Station. This work includes pile driving, which will result in temporary and intermittent noise impacts. The construction crews will minimize noise as much as possible. To expedite construction, some work activities may be scheduled at night or on weekends. The work is expected to be completed by late April.

### *Pile Driving Schedule:*

April 1- 30, 2014

Monday through Friday  
7 a.m. - 4 p.m.

Occasional night work (4 p.m. to 1:30 a.m.) and weekend work (day or night) may be necessary.

Please use extra caution near construction crews or vehicles.

*We appreciate your patience during construction.*

**About the Project:** The Sorrento Valley Double Track project will help to improve the reliability and on-time performance of COASTER, Amtrak, and BNSF Railway services. The project adds a second mainline track and a new 81-space surface parking lot. It will also replace two aging bridges, raise railroad tracks above the flooding level of 50-year storm events, and install drainage and embankment improvements.
