

MID-COAST TROLLEY

# MID-COAST TROLLEY CONSTRUCTION UPDATE

APRIL 2019

## Upcoming Construction Activities for the Mid-Coast Trolley Project

### Traction Power Substation (TPSS) Installation on Olive Street

On Wednesday, April 17, a traction power substation (TPSS), which will provide power for the Trolley, will be installed at Olive Street, near the railroad right-of-way. For the safety of the crews and the public, parking and lane restrictions will be in place while the work is underway.

### What to Expect

- TPSS installation work will be conducted on April 17, from 2 a.m. to 4 p.m.
- Temporary parking restrictions and a lane closure on Olive Street and Kettner Boulevard will be in effect while work is underway to allow crews to install the TPSS safely. Signage will be placed in advance of parking restrictions, and flaggers will be present to direct traffic.
- Access to two driveways on Olive Street will be impacted while work is underway. See Page 2 for a map depicting the work area and driveway closures.
- Underground communications work, electrical work, and preparation of the TPSS near Olive Street is ongoing and will continue intermittently through summer 2019.
- Crews will minimize impacts as much as possible.

**Construction schedules may change with very little notice.

## About the Project

The Mid-Coast Trolley project will extend Trolley service from Old Town Transit Center to the University City community, serving major activity centers such as Mission Bay, the VA Medical Center, UC San Diego, and University Town Center. Nine new stations will be constructed. Major construction work began in 2016, with service anticipated to begin in late 2021.
