

TRACTION POWER SUBSTATION (TPSS) INSTALLATION ON OLIVE STREET

On Wednesday, June 26, a second traction power substation (TPSS), which will provide power for the Trolley, will be installed at Olive Street, near the railroad right-of-way (south of where the first TPSS was installed on April 17). For the safety of the crews and the public, parking and lane restrictions will be in place while the work is underway.

What to Expect

- TPSS installation work will be conducted on June 26, from 2 a.m. to 4 p.m.
- Temporary parking restrictions will be in place on Olive Street and Kettner Boulevard, and one lane will be closed on Olive Street. Signage will be placed in advance of parking restrictions, and flaggers will be present to direct traffic.
- Access to two driveways on Olive Street will be impacted. See Page 2 for a map depicting the work area and driveway closures.
- Underground communications work, electrical work, and preparation of the TPSS near Olive Street is ongoing and will continue intermittently through summer 2019.
- Crews will minimize impacts as much as possible.

Construction schedules may change with very little notice. Check KeepSanDiegoMoving.com/MidCoastNotices for regular schedule updates.

About the Project

The Mid-Coast Trolley project will extend Trolley service from Old Town Transit Center to the University community, serving major activity centers such as Mission Bay, the VA Medical Center, UC San Diego, and University Towne Centre. Nine new stations will be constructed. Major construction work began in 2016, with service anticipated to begin in late 2021.
