

I-5/Genesee Avenue Interchange Project

The Project

The Interstate 5 (I-5)/Genesee Avenue Interchange Project will replace the existing six lane Genesee Avenue overpass with a ten lane bridge that will accommodate current and future traffic demands in the job intensive community. The project is an integral piece of the broader improvements planned along I-5 in the North Coast Corridor. Along with the replacement of the overcrossing, the project will also widen the freeway access ramps, add an auxiliary lane in the northbound direction on I-5 between Genesee Avenue and Roselle Street, and construct a new, separated bike path. By providing links to transportation, employment centers, hospitals, and UC San Diego, the project will greatly improve the movement of people and goods through the area.

Key features of the I-5/Genesee Avenue Interchange Project include:

- Replacing the existing overcrossing at Genesee Avenue with an improved bridge that accommodates additional vehicle lanes, sidewalks, and bicycle routes;
- Widening the freeway access ramps at Genesee Avenue and Sorrento Valley Road;
- Widening Genesee Avenue in both directions adjacent to the freeway to provide new through and turn lanes; and
- Constructing approximately three miles of bicycle paths in both directions from Roselle Street to Voigt Drive.

Project Schedule and Funding

Construction Start Date

Early 2015

Completion Date

Summer 2018

Funding Sources

Federal - \$52.9 million

City of San Diego - \$22.9 million

State - \$21.6 million

SANDAG (TransNet) - \$18.3 million

UC San Diego - \$1.7 million

Contractor

Flatiron

Total Project Cost

\$117.4 million
