

San Elijo Lagoon Highway Bridge

San Elijo Lagoon Highway Bridge Simulation

San Elijo Lagoon Pedestrian Path Simulation

San Elijo Lagoon Bike/Pedestrian Bridge Path Simulation

San Elijo Lagoon Highway Bridge

- Widening the bridge will accommodate one new Carpool/HOV Lane along I-5 in each direction
- Lengthening the bridge will improve tidal flow and overall lagoon health
- Bridge will include a new bike/pedestrian suspension bridge that will link the south and north sides of the lagoon
- Construction Timeline:
 - Begin Early 2017
 - Complete 2022
- Bridge is being built to its ultimate width to accommodate long-term improvements, which may include a second Carpool/HOV Lane in each direction and a Direct Access Ramp from Manchester Avenue.
