

SR 76 East Segment Project Construction Advisory #47

Traffic Delays on SR 76 at Via Monserate on February 8

Crews will be installing a new traffic signal pole at State Route 76 (SR 76) and Via Monserate on Wednesday, February 8, between 9 a.m. and 3 p.m. The signal will be out of service and flagging crews will direct motorists through the intersection.

Motorists are urged to allow extra time for their commute. The work schedule is subject to change due to weather conditions. We appreciate your patience as we complete improvements.

This work is part of the SR 76 East Segment Project – the last in a series of transportation improvements in the corridor, funded in part by the *TransNet* regional half-cent sales tax.

Traffic Signal Installation at Via Monserate and SR 76
